

### Restoring a can

**Difficulty: \*\***

**Preparation: \***

*After getting an empty and deformed soda can, using your magic skills, you will restore it and drink its content and everything will be visible to the audience.*

*For this, a little preparation is necessary:*

*Using a metal tip (thumbtack, small screwdriver...) pierce a soda can of your choice.*

*Do not use a beer can.*

*Pour about 1/3 of your soda inside a container.*

*Carefully twist your can, avoiding tearing the thin wall of the can.*

*Position the "empty bottle effect" at the can opening.*

*You can place your prepared can in a clean recyclable waste garbage can.*

*Grasp your prepared can between your thumb and forefinger which will plug the opening. Show the audience that the can is empty without shaking it too much.*

*Put the index finger of your other hand on the "empty bottle effect" that you will discreetly remove and shake the can which will be reconstituted through the gas action.*

*Open the can and pour yourself a drink... Everything is visible.*
