

The haunted pen

*Difficulty: **

*Preparation: ****

You will need a pen with a cap, a fairly tall clear glass, two small adhesive balls and your invisible thread.

Cut the length of thread needed for your trick.

Using a white sheet of paper to help you see the thread better, strip a strand of invisible thread as thin as possible.

Wrap a small adhesive ball around the end of the invisible thread. Tape the ball to your table and slide the invisible wire assembly toward you until your invisible wire is free of the assembly.

Wrap another adhesive ball around the other end of your thread.

Store the thread set for safekeeping.

Glue one ball to your thumbnail.

Place the other end of the thread in the cap and place the cap on the pen gently.

Place the pen in the glass, being careful that the wire is not stretched or tangled.

Once in place, try to feel the tension of the thread and move the pen inside the glass with your hands open.
