

Cube ball

Difficulty: *

Preparation: *

Turn your cube into a ball by passing the side opposite the opening into the opening.

Shape it into a ball.

Get another foam ball.

Avoid showing the flat side of your processed ball and place it between your thumb and forefinger, while hugging the shape.

Press down on the rounded part of your processed ball with the other regular ball. This simple but precise technique will allow you to make the balls disappear and make a cube appear instead.
