

Svengali prediction envelope

*Difficulty: **

*Preparation: **

You will have to place a svengali card in an envelope. This will be your prediction.

Before each round with the Svengali deck, always check that the svengali cards are well alternated 1 on 2 with the marked deck and that the 7 of diamonds of the marked deck is removed from the deck.

The first visible card should be a card from the marked deck and the last, above the deck, a svengali card.

Once your preparation and the checks necessary for the proper operation of the trick, that the svengali cards are well alternated 1 on 2 with the deck marked and the 7 of diamonds of the marked deck is well removed from the deck.

ask the spectator to tell you "stop" when desired, when you go through the deck. As you can see, no matter what choice the spectator makes, they will stop you on a 7 of diamonds (6 of hearts in the video).

All you need to do is reveal your prediction by taking the card out of the envelope.
